

Project MED

Project MED is an innovative sea-freight solution for the projects segment. By utilizing a fleet of own roll trailers with a capacity up to 120 tons Centralog offers comprehensive oversize cargo transportation within the Mediterranean area.

Cargo specs flexibility

Optimal transport solution

Extensive service network

Cargo specs flexibility

Larger scale cargo capacity compared to containers

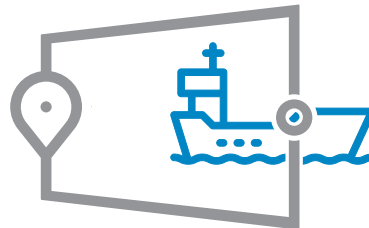

*Up to 120 tons capacity
Length over 12 meters
Height up to 6 meters*

Optimal transport solution

Optimal route planning

Fastest route planning – direct connections between main ports and shorter transit times compared to container service

Extensive service network

Improved vessel employment

Utilization of different carriers improves the trailer operating efficiency and consequently costs & freight levels

ENERGY

ENGINEERING & MANUFACTURING

AEROSPACE & AVIATION
